Dear Mr Arteaga Montenegro

I am writing to congratulate you on your recent achievement at Cranfield University.

I am pleased to advise that you have successfully completed the degree of MSc in Computational Fluid Dynamics.

Details regarding graduation and arrangements for your degree certificate will be provided by email in due course. It is extremely important that you keep us informed of changes to your email address and other contact details so you do not miss this information. You can update your details by accessing your EVE account.

If you require any further information on your award please do not hesitate to contact the Registry team at the email address below with details of your requirements.

With best wishes for the future.

Yours sincerely

Maeve Williamson
Senior Registry Administrator
On behalf of the Academic Registrar

Cranfield University is a United Kingdom recognised institution which has degree awarding power as defined by the Department for Business, Energy and Industrial Strategy. Please refer to their website for further information: www.gov.uk/guidance/recognised-uk-degrees.
Our UK visa and immigration sponsor number is H4XU0T7G1.

Cranfield University

Name of Student:	**Daniel Alejandro Arteaga Montenegro**		
Student Number:	453504	Date of Birth:	19 June 1998
Programme of Study:	MSc in Computational Fluid Dynamics		
Registration Dates:	30 September 2024 - 12 September 2025	Mode of Attendance:	Full-time
Teaching Institution:	Cranfield University	HESA Reference:	24100078220002808
Awarding Institution:	Cranfield University	Language of Instruction:	English
Award Obtained:	Master of Science	FHEQ Level:	7
Award Overall Mark:	80.3	Result Confirmation Date:	12 November 2025

Record of Learning and Achievement	**Mark%**	**Credit Value**
Data Analysis and Uncertainty	87	10
Grid Generation / CAD	88	10
Introduction to Fluid Mechanics and Heat Transfer	78	10
Numerical Methods and High Performance Computing	73	20
Numerical Modelling for Compressible Flows	90	10
Numerical Modelling for Incompressible Flows	80	10
Turbulence Modelling	68	10
Thesis	84	80
Group Project	74	40

Thesis Title: Assessment of Multiple Reference Frame (MRF) and Sliding Mesh methods on a brake system and wheel model

Total Credits Gained: 200

On behalf of the
University Academic Registrar

Date transcript issued: 13 November 2025

NB: Students are required to pass the course overall with a mark of 50% and also to pass both the taught phase of the course and the thesis if applicable, the pass mark being 50%.
